

Muhammad Faizan Ali

Junior DevOps Engineer | Cloud & Automation Enthusiast

Lahore, Punjab, Pakistan | 0323-8999236 | faizandevops.pk@gmail.com

Linkedin: <https://www.linkedin.com/in/faizandevops/> | GitHub: <https://github.com/mfaizandevops>

Professional Summary

Junior DevOps Engineer with hands-on experience in Microsoft Azure, Docker, Kubernetes, Terraform, Git, GitHub Actions, and Linux. Experienced in designing and implementing CI/CD pipelines, containerizing applications, automating infrastructure using Infrastructure as Code (IaC), and deploying cloud-based solutions. Skilled in Azure Virtual Machines, networking, RBAC, monitoring, and Bash scripting through hands-on labs and real-world projects. Passionate about cloud computing, automation, and DevOps best practices, with a strong commitment to continuous learning and delivering reliable, scalable, and secure solutions.

Projects

CI/CD Pipeline Implementation

- Built CI/CD pipelines using GitHub Actions to automate build, testing, and deployment.
- Deployed Dockerized applications on Azure Virtual Machines with Nginx.
- Implemented version control and rollback strategies to improve deployment reliability.
- Automated deployment workflows, reducing manual effort.

Smart Task Management System

Link: <https://github.com/mfaizandevops/Smart-todo>

- Developed and containerized a full-stack application using Docker.
- Designed automated deployment workflows for reliable releases.
- Built a scalable, cloud-ready architecture for Azure deployment.
- Applied DevOps best practices to ensure environment consistency and streamline the application lifecycle.

Portfolio Website Generator

Link: <https://github.com/mfaizandevops/portfolio-website-generator>

- Containerized the application using Docker for consistent environments.
- Built a Python/JavaScript-based tool to generate dynamic portfolio websites.
- Configured local and deployment environments to streamline development.
- Standardized environments to improve deployment consistency.

Fleet Asset Tracker (Real-Time System)

- Supported backend integration and deployment workflows.
- Developed real-time tracking features using WebSockets and Maps API.
- Built a responsive real-time data processing system.
- Prepared the application for scalable deployment and monitoring.

Hands-on Lab Experience

- Planned and optimized Microsoft Azure cloud deployments using cost estimation, resource tagging, and management best practices.
- Deployed and managed Windows and Linux Virtual Machines (VMs) using Azure Portal and Azure CLI.
- Configured Azure Virtual Networks (VNETs), Subnets, Network Security Groups (NSGs), Storage Accounts, Load Balancer, and Azure SQL Database.

- Implemented Role-Based Access Control (RBAC) and Microsoft Entra ID (Azure AD) for secure identity and access management.
- Managed Azure Resource Groups and Storage Accounts to organize and optimize cloud resources.
- Configured Azure App Service with Autoscaling and monitored resources using Azure Monitor and VM Insights.
- Performed Linux system administration on Ubuntu and CentOS, including user management, package management, permissions, and troubleshooting.
- Conducted network scanning and basic security assessments using Nmap.
- Gained hands-on experience with Docker containerization, Kubernetes deployments, GitHub Actions CI/CD pipelines, and Terraform for Infrastructure as Code (IaC).

Technical Skills

- **Cloud Platforms:** Microsoft Azure (Virtual Machines, Virtual Networks, Storage Accounts, RBAC, App Services, Azure SQL Database, Autoscaling)
- **CI/CD & DevOps:** GitHub Actions, Azure DevOps
- **Infrastructure as Code (IaC):** Terraform
- **Containers & Orchestration:** Docker, Kubernetes (Pods, Deployments, Services)
- **Operating Systems & Web Servers:** Ubuntu, CentOS, Nginx
- **Monitoring & Automation:** Azure Monitor, VM Insights, Bash Scripting
- **Version Control:** Git, GitHub, GitLab (Branching, Pull Requests, Merge Requests)
- **Security & Networking:** Microsoft Entra ID (Azure AD), IAM, RBAC, Network Security Groups (NSGs), IP Addressing, Subnetting, Zero Trust (Basics)
- **Frontend (Basic):** HTML5, CSS3, Bootstrap

Education

Bachelor of Science in Information Technology (BS-IT)

University of the Punjab, Lahore

August 2024 – September 2028 (Expected)

Certifications

- Microsoft Certified: Azure Fundamentals (AZ-900)
- Microsoft Learn: Safeguard Your Environment with Microsoft Defender for Identity
- Cloud Computing Essentials (AWS)
- Configuration Management and the Cloud (Coursera)
