PROFESSIONAL SUMMARY

Junior DevOps Engineer with hands-on experience in Continuous Integration/Continuous Deployment (CI/CD), Docker containerization, and Microsoft Azure cloud infrastructure (IaaS & PaaS). Skilled in Linux system administration, Infrastructure as Code principles, cloud networking, and automation. Passionate about scalable architecture, monitoring, and DevOps best practices.

PROJECTS

CI/CD Pipeline Implementation

- Designed and implemented CI/CD pipelines using GitHub Actions
- Deployed Dockerized applications on Azure Virtual Machines
- Configured Nginx reverse proxy for application routing
- Implemented version rollback to ensure deployment stability

Smart Task Management System

- Developed and containerized a full-stack application using Docker
- Automated application deployment workflow
- Prepared system for cloud deployment with scalable architecture

Portfolio Website Generator

- Built a Python/JavaScript-based tool to generate dynamic portfolio websites
- Containerized the application using Docker for consistent deployments
- Configured local development and deployment environments

AI Translation Website (English → Urdu)

- Developed Flask-based web application for language translation
- Containerized application using Docker
- Optimized application for cloud deployment and testing consistency

Social Media Post Manager

- Built a Django-based platform for scheduling and managing posts
- Containerized services using Docker
- Prepared application for CI/CD automation workflows

Fleet Asset Tracker (Real-Time Project)

- Worked on real-time tracking features using **Maps and WebSockets**.
- Supported backend integration and deployment workflows.

HANDS-ON LAB EXPERIENCE

- Estimated Azure VM costs and planned cloud resource deployments
- Deployed and managed **Windows & Linux VMs** using Azure CLI
- Configured VNets, storage accounts, and Azure SQL Databases

- Applied Azure TAGs and cost management best practices
- Managed **Azure RBAC**, resource groups, and storage services
- Practiced Linux system administration on CentOS (VirtualBox)
- Performed network scanning and security testing using **Nmap**
- Configured Azure Active Directory roles and IAM policies

EXPERIENCE

DevOps Intern (Freelance Projects)

Remote | Hands-on Experience

- Worked as a DevOps Intern with a freelance DevOps professional on multiple client and practice projects.
- Assisted in building and maintaining CI/CD pipelines using GitHub Actions and Azure DevOps.
- Deployed and managed applications on Linux servers (Ubuntu / CentOS).
- Containerized applications using Docker for testing and deployment.
- Used Git for version control, collaboration, and code reviews.
- Supported Microsoft Azure cloud operations, including VMs, storage, networking, and RBAC.

TECHNICAL SKILLS

Cloud & DevOps: Microsoft Azure (VMs, Storage, VNets, RBAC, Web Apps, Autoscaling), GitHub Actions, Azure DevOps

Containers: Docker, Kubernetes (Pods, Deployments, Services)

Linux & Web: Ubuntu, CentOS, Nginx

Monitoring & Automation: Azure Monitor, VM Insights, Bash

Version Control: Git, GitHub, GitLab (Branching, Pull Requests, Merge Requests, Repository Management)

Security & Networking: IAM, RBAC, Zero-Trust (Basics), IP Addressing, Subnetting

Frontend (Basic): HTML5, CSS3, Bootstrap 5

EDUCATION

University of Punjab, Lahore - **BS-IT**

August 2024 - September 2028

4th Semester (In Progress)

Certifications

- Microsoft Certified: Azure Fundamentals (AZ-900)
- Microsoft Learn: Safeguard your environment with Microsoft Defender for Identity.
- Cloud Computing Essentials (AWS).
- Configuration Management and the Cloud.
